

As soon as I get some decent programming, the whiners at NAB strive to stifle competition. I use the XM satellite radio weather stations all the time in my sports photography business. I use the traffic info daily since, frankly, it's BETTER and MORE COMPLETE than the traffic reports on the local "all news" AM station

Frankly, I had given up on commercial radio years ago. Tired of hearing the same thing over and over punctuated by tirades of advertising. Competition is the only way anything gets better...

SAY NO TO NAB Petition 04-160! Let ClearChannel use some of it's unworldly profits to keep up with the technology instead of squelching a service that they can't squash.

Thanks, and back to your regularly scheduled program (on XM)
